Advancing pharmacy supply chain management

Supplylogix® By MᶜKESSON

Supplylogix® helped a large health system with pharmacies to enhance efficiency and reduce operational costs

Reduced the client's inventory by over **$1 million,** surpassing their initial target

Introduction

At Supplylogix, we are committed to modernizing pharmacy supply chain management through innovative end-to-end solutions. In this case study, we showcase our partnership with a large health system of over 100 hospitals nationwide. By leveraging our technology, the client aimed to help enhance efficiency, reduce operational costs, and help achieve superior health outcomes across their extensive network.

Challenge

Our client faced significant challenges in streamlining inventory management processes across their vast network of hospitals. They sought solutions to reduce operational costs, improve efficiency, and strive for a return on investment (ROI) within a tight timeframe. Additionally, they required dedicated support to develop and maintain an effective inventory management strategy tailored to their unique needs.

Solution implementation

Supplylogix provided tailored solutions to address the client's specific challenges and objectives. Our comprehensive inventory management platform offers increased visibility, pharmaceutical asset management, and streamlined processes. Our dedicated team of account managers also collaborated with the client to help develop and execute an effective inventory management strategy.

Learn more

Supplylogix's innovative solutions helped enable this health system to modernize its pharmacy supply chain management and drive operational cost savings, efficiency improvements, and advanced health outcomes. By leveraging Supplylogix's comprehensive inventory management platform and dedicated account management support, the client exceeded their ROI expectations and achieved value within a short timeframe. This case study underscores the transformative impact of partnering with Supplylogix to optimize pharmacy supply chain operations and deliver superior results.

Key solutions implemented:

- **Comprehensive inventory management:** Our platform empowered the client with valuable insights into their inventory across multiple locations, enabling them to optimize inventory levels and effectively reduce administrative costs.

- **Dedicated account management support:** Our team of account managers provided ongoing support to ensure the successful implementation and maintenance of the inventory management strategy.

Results

- Within the first six months, using Pinpoint Order, Supplylogix **reduced the client's inventory by over $1 million**, surpassing their initial target.

- Supplylogix helped facilitate inventory transfers **valued at over $800,000** within the same period, with a sell-through rate of **greater than 90%**.

- Additional value demonstrated: Supplylogix set up Product Ordering Group (POG) **valued at approximately $15,000.**
